

The map illustrates the water supply infrastructure for the Honville and Québrux region. Key features include:

- Water Supply Network:** A series of pipes connecting various locations, with diameters ranging from Ø80mm to Ø125mm. Flow rates are specified at several points, such as 2.50l/s and 4.00l/s.
- Reservoirs:** Two main reservoirs are shown: 'Réservoir Québrux' and 'Réservoir de Québrux'. The latter has a capacity of 150 m³ and a radius of 532.00 m.
- Locations:** The map covers several villages and areas, including Honville, Québrux, and Haut-Québrux. Specific locations like 'A LA BOUDIERE', 'A LA NAYELLE', and 'A LA GRETTE' are marked.
- Infrastructure:** The map shows a network of roads, fields, and buildings. It also includes a 'compteur pour camping' (camping meter) and a 'Réservoir de Québrux' (Québrux Reservoir).
